(ICMP <or> HTTP <or> DNS <or> UDP <or> VoIP) <near/8>

Nothing Found

date search of 6/00

Your search for (ICMP <or> HTTP <or> DNS <or> UDP <or> VoIP) <near/8> metric <near/3> test* did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a + if a search term must appear on a page.

museum +art

- Exclude pages by using a - if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago

August 1999 **International Journal of Network Management**, Volume 9 Issue 4**Publisher:** John Wiley & Sons, Inc.

Full text available: pdf(570.61 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This article presents the implementation of a maintenance application for cellular switching system using the multi-agent paradigm. The main philosophy behind the design of the multi-agent system is based on the TMN framework, where each agent can mapped with one or several TMN functional blocks.
